

# GAIA Seminar

## on Complex Analytic Geometry

 **Title : The automorphism group of a certain unbounded domain**

 **Speaker : Atsushi Yamamori (POSTECH/GAIA)**

 **Abstract**

In this talk, we will study the automorphism group of a certain unbounded domain. For the study, the notion of the Bergman representative mapping and an explicit form of the Bergman kernel of the domain are used.

This is a joint work with Hyeseon Kim and Ninh Van Thu.

 **Date : 8-10 p.m., Monday, 27 May 2013**

 **Place : The GAIA (Math Science building room 106)**
